## 100 YEARS OF QUALITY

FOR FIVE GENERATIONS BEAK & SKIFF HAS BEEN  
GROWING APPLES IN LAFAYETTE, NY

### ABOUT US

Our family owned orchard began in 1911 when George Skiff, an onion farmer on the North Side of Syracuse, and Andrew Beak, a dairy farmer, met at the farmers market and decided it would be fruitful to join forces and enter the emerging apple business. They found that the hillside area along Route 20 provided the perfect conditions for growing apples and began planting that very year.

During the 1920s and 30s, Beak & Skiff began selling apples to grocery stores such as Victory, ASP, and other small local grocers.

### OVER 100 YEARS OF QUALITY

For over 100 years, one thing has remained constant – our commitment to growing the best apples possible. Throughout the year, we keep a careful watch on our trees and maintain them with the latest growing techniques. Every winter each one of our 300,000 trees is trimmed by hand. In the spring we bring in over 400 hives of bees to help pollinate our crop, and we also keep a close watch on the weather in order to fend off any potential threats of frost. In 1956, our third generation made us the first orchard to utilize wind machines as an effective deterrent. We understand the importance of keeping our trees happy!

It's our commitment to making sure every tree grows as strong as possible that produces the consistent quality of apples for which we are known. Our apples are available for Pick Your Own at Apple Hill, for purchase by the box on our website, and at your local grocer.

## BEAK & SKIFF APPLE ORCHARDS

### WHO WE ARE

Our family owned orchard began in 1911 when George Skiff, an onion farmer on the North Side of Syracuse, and Andrew Beak, a dairy farmer, met at the farmers market and decided it would be fruitful to join forces and enter the emerging apple business. They found that the hillside area along Route 20 provided the perfect conditions for growing apples and began planting that very year.

During the 1920s and 30s, Beak & Skiff began selling apples to grocery stores such as Victory, A&D and other small local grocers.

The 1930s brought some of the toughest years for American agriculture as drought swept across the nation. In 1937, the hardships struck close to home when it became so dry that all the trees in the orchard lost their leaves.
